SUMMARY

A highly skilled and adaptable **Software Engineer & Frontend Developer** with a strong foundation in **JavaScript, TypeScript, and PHP**. With experience working on **healthcare, fintech, and CMS platforms**, I have built and optimized scalable web applications using **React.js, Vue.js, Next.js, and various state management libraries like Redux and Pinia**.

My background in **Mathematics and Marketing** gives me a unique perspective on business needs, allowing me to create user-centric applications that align with both technical and operational requirements. Skilled in **RESTful APIs, GraphQL, low-code platforms (Wavemaker, WordPress), and cloud deployment (AWS, Docker, Firebase)**, I am passionate about building efficient, high-performance applications that enhance user experience and business growth.

Currently contributing to the development of **Electronic Medical Record (EMR) systems, payment dashboards, and custom CMS solutions**, I am always eager to explore new technologies and drive innovation in web and mobile development.
